

## Multiculturalism

Multicultural education exposes children to people who have different values and attitudes, and foster acceptance of cultural differences which is vital for a safe and inclusive learning environment.

## Celebrate Diversity

We believe in helping children to feel good about themselves, their families, and their communities, and also exposing children to differences, things that are unfamiliar, and experiences beyond their immediate lives.

## Social Emotional Development

Children are born with the need and desire to connect with those around them. When teachers and providers establish positive relationships with children from birth through the early years, and value their diverse cultures and languages, children feel safe and secure, laying the foundation for healthy social and emotional development. This process affects how children experience the world, express themselves, manage their emotions, and establish positive relationships with others. Social and emotional development involves several interrelated areas of development, including social interaction, emotional awareness, and self-regulation.

## Together we are Better

At Brighten Our Future Early Learning Center we believe in fostering the overall development to help families succeed. When barriers are eliminated to basic needs like childcare and food it allows for parents and families to thrive.

Future Early  
Learning Center**

## Play to Learn

Play-based learning also plays an important role in the development of healthy social and emotional habits in children. When children play with other children, they learn to cooperate, communicate, and engage with their peers.

## S.T.E.M

**Science, Technology, Engineering, Math**

**STEM** education helps children better understand the world and relate to it. **STEM** involves introducing children to new concepts through activities and games. It essentially helps them live the concepts rather than only reading about them

## Art is Life

By engaging in art activities, children practice a variety of skills and progress in all areas of development. Creative art helps children grow in physical, social, cognitive, and emotional development. Children also practice imagination and experimentation as they invent new ways to create art

## Exceptional Staff

**Our educators and providers understand the importance of development in the early years. We are here to make a positive impact in the community while preparing children for future success and life skills.**

**"If kids comes to us from strong, healthy, functioning families, it makes our job easier. If they do not come to us from strong, healthy functioning families, it makes our job more important."**
